

Planning

Purpose

- The program simulates a simplified Jeopardy-style quiz game.
- Contestants answer questions phrased as answers, responding in the form of a question.

Game

Number of categories: At least 3

- Number of questions: At least 3 per category.
- Timing: Limit each response to a set time
- Scoring: Correct response adds points and incorrect response subtracts points.
- Winning Condition: Highest score after all questions.

Roles

- **Host:** Presents categories, tracks score, checks correctness.
- **Contestant:** Selects category and responds with "What is/Who is ... ?"

Game

- Start game.
- Show categories and question values.
- Contestant selects a category and an amount.
- Display the question
- Get contestant response
- See if answer is correct:
 - If correct → add points.
 - If incorrect → subtract points.
- Repeat until no questions are left.
Display final scores and winner.
- End game.
